

目录-DIRECTORY-

世界典型铝合金厚板的生产企业(1)

Global representative enterprises of aluminum alloy thick plate(1)

镁-铝合金中 $Mg_{17}Al_{12}$ 相形态改善技术的研究现状

Research status of improving the morphology of $Mg_{17}Al_{12}$ phase in magnesium aluminum alloy

架空导线用高中强铝合金锭坯轮带式连铸生产工艺

Technology of rotary-wheel continuous casting process of aluminum alloy ingots of high and moderate strength for overhead conductors

均匀化退火对7N01率黑金铸锭组织和性能的影响

Effect of homogenization annealing on microstructure and properties of 7N01 aluminum alloy ingots

退火工艺对不同锌含量的铜/铝-锌合金冷轧复合带界面组织形貌以及结合强度的影响

Effects of the annealing process on the interface microstructure and bonding strength of Cu/Al-Zn alloy cold rolled composite strip with different Zn

电解铝液直接铸轧生产瓶盖用8011-H16铝合金板工艺研究

Study on cast-rolling production process of 8011-H16 aluminum sheets for bottle caps with electrolytic aluminum liquid

6A02铝合金薄壁管材退火工艺试验研究

Research on the annealing test of thin-wall tubes of 6A02 aluminum alloy

7XXX系铝合金制品中点状缺陷的分析

Analysis of point defects in the products of 7000 aluminum alloy

铝合金板材边部分层缺陷超声波无损检测

Ultrasonic nondestructive testing of the delamination defect on aluminum alloy plate edges

铝板带箔表面含油量检测方法—三波长红外法

Measuring method of oil content on the aluminum plate, strip and foil surface—three wavelength infrared method

Mg-8Li-1Al合金表面磁控溅射法制备Ti/TiN复合薄膜的研究

Research on preparation of the Ti/TiN composite thin film on the Mg-8Li-1Al alloy surface by magneto controlled sputtering

AZ31镁合金表面磁控溅射Al和TiN的试验研究

Research on surface properties of Al and TiN films deposited on AZ31 magnesium alloys by magnetron sputtering

新型高电位镁合金牺牲阳极的研究开发

Research and development of the new type of magnesium alloy sacrificial anode with high electric potential

固溶处理对AZ91镁合金铸棒组织和性能的影响

Effect of solution treatment on microstructure and mechanical properties of AZ91 magnesium alloy casting rods
