

目 录-DIRECTORY-

中国航空铝材迈入高需求期

A new era of high demand for aviation aluminum materials

Mg-Li 合金研究现状及其发展趋势

Research status and development prospects of Mg-Li alloy

石墨烯铝基复合材料的研究进展

Research progress on graphene reinforced aluminum-based composites

电磁振荡场对铸轧 **1100** 铝合金组织的影响

Effect of electromagnetic oscillating field on microstructure of roll-casting 1100 aluminum alloy

退火制度对不同终轧温度 **5083** 铝合金热轧板组织和性能的影响

Influence of the annealing process on the microstructure and properties of hot-rolled sheets of 5083 Al alloy at different finishing temperatures

往复挤压工艺对汽车用 **5052** 铝合金热轧板组织和性能的影响

Effects of reciprocating extrusion on properties of 5052 aluminum alloy for automobile

铝挤压模具装配工艺的改进

Improvement of the assembly process of the aluminum extrusion die

循环墩压制备 **Mg-4.1Mg₂Si** 复合材料的组织和力学性能

Microstructure and mechanical properties of Mg-4.1Mg₂Si composite processed by cyclic upsetting

加热方式对体育器材用 **5052** 铝合金锻压件性能的影响

Effects of heating methods on mechanical property and corrosion resistance of 5052 aluminum alloy forgings for sports

高效铝型材粉末喷涂的快速换粉装置

Rapid powder changing devices for Al profile coating

挤压变形量对铝合金钉孔试样疲劳性能的影响

Effects of different interference values on fatigue properties of aluminum alloy specimens with fastener holes

体育器材用 **5052** 铝合金管件的磁脉冲连接工艺的试验研究

Research on the electromagnetic pulse joining process of 5052Al alloy pipes for sports equipment

分区活性焊对 **6061** 铝合金焊缝的影响

Influence of flux zoned TIG welding on 6061 aluminum alloy weld
